Thank you for purchasing an ALIGATOR product. Please read this instruction manual for your new smart ring.

Important instructions

- Handle the product and accessories with care and protect them from mechanical damage and dirt.
- Protect the product and accessories from extreme temperatures.
- Do not throw the product into fire or expose it to temperatures above +60°C. The product contains a built-in battery.
- Protect the product and accessories from falling to the ground.

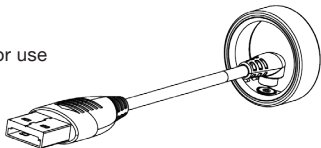

- The product does not contain any user-repairable parts, never disassemble the product or accessories.
- Do not use the product on a plane unless specifically permitted – the ring is always on when the battery is at least partially charged and cannot be switched off.
- Do not use the product near explosives.
- Keep out of reach of children and do not allow them to play with the product. It may contain small parts that could choke them or otherwise injure them.
- The software and hardware of the product is continuously upgraded. The manufacturer therefore reserves the right to change the instructions and individual functions without prior notice.

Package contents and charging

- Smart ring
- Instructions for use
- Magnetic adapter

Charge the ring before first use. To charge, use the included magnetic adapter, which is attached to the contacts on the inside of the ring. The magnets snap onto the end of the adapter and plug the other end into a suitable USB socket.

A charging case (order code **ARCHR6**) can also be purchased as an optional accessory. The charging case also has a built-in battery pack allowing for charging even in places where no electrical outlet is available.

Connecting the ring to the phone

For full functionality, the smart ring must be wirelessly connected to the app on your phone. Download and install the **ECTRI** app on your phone:

Attention! After installation and the first run, you will need to enable all the permissions that you will be asked for several times, otherwise the application will not work properly.

To protect your purchased device, you must register and create a user profile.

If you have already registered, enter your login details and log in.

Connect the ring to your phone:

1. Open the **“Devices”** tab in the app and press **“Add Device”**. The app will prompt you for permission to find devices nearby.
2. Hold the ring close to your phone and the app will list the devices found.

3. Select **AligatorR6** and tap **“Connect”**.
4. The ring will be paired.
5. Here you will need to allow the application the permissions it will request, otherwise it will not work properly. Done.

Ring settings in the app

In the **ECTRI** app and at the bottom of the screen, select the **“Devices”** tab. Tap on the paired **AligatorR6** ring to open the device settings menu, health and more.

Restarting or resetting the ring is done with the “Device Settings” button.

Display measured data on your phone

Once the ring is paired with your phone, launch the **ECTRI** app and press the “**Home**” icon at the bottom of the app screen. The information downloaded from the ring will be displayed – step count, heart rate, blood pressure, blood oxygenation, distance, calories and more.

Note: The ring must be close to the phone (max. 4m) for successful wireless data transfer from the ring.

Managing permissions

You can check your mobile phone's permissions using the **ECTRI** app under the “**Devices**” tab. If you would like to change the settings, you need to go to the phone's system settings.

Record training using the ring in the app

The ring allows you to record activity using the **ECTRI** app on your phone, including the route obtained from your phone's GPS receiver.

In the “**Movement**” tab, select from a list of several sports. Press the “**GO**” button to start recording movement activity. Pause or stop is controlled in the app. The activity record is saved and can be

viewed back in the “**Movement**” tab or in the “**Home**” tab.

By pressing the ring or phone icons in the “**Movement**” tab, you can turn on/off anything you want to record – step count, step frequency, heart rate or route recording using your phone’s GPS receiver.

Edit personal settings and data

To edit your personal information and change some other settings in the app, press the “**Profile**” icon at the bottom of the screen and tap “**Personal Information**”. You will now be able to set your weight, age and other information about yourself

Sports goals are set in the “**Movement**” tab by tapping the cog symbol.

Waterproof IP67

The ring is designed to IP67 waterproof standard, however, we strongly recommend that you avoid contact with water as much as possible.

Never dive, bathe or shower with the ring – pressurised or hot water could penetrate the ring and cause damage not covered under warranty.

Troubleshooting

The ring does not connect

If you are unable to connect the ring to your phone, try turning Bluetooth off and on on your phone and restarting your phone. If the ring doesn't connect, try searching for it in the app again.

The ring cannot be charged with a power bank

The charging current of the ring is very small. Therefore, some power banks mistakenly evaluate the connected ring as a phone that is already charged and automatically turn off the charging.

Safety and ecology

Built-in battery

The product contains a built-in lithium battery, which does not belong in normal municipal waste, may contain substances  harmful to the environment! Once the product has reached the end of its life, the battery can be removed and handed over for further environmentally friendly treatment. Always leave the removal of the battery to a specialist/qualified service technician.

Used electrical equipment

Never dispose of the product in normal municipal waste, it may contain substances hazardous

to the environment! After use, it must be handed over to the appropriate collection point for recycling or environmentally friendly disposal. Check with your dealer or municipal office where such a place is located or you can hand it over directly to the dealer or to one of the ADART COMPUTERS s.r.o. branches.

It is illegal to handle the product in contravention of these instructions!
